HER WORLD

Game Design Document

Lifestyle Simulation / Virtual Nightlife & Social Lounge

Platform: Mobile (Android first, iOS secondary)

Age Rating Target: 17+ / Mature

Version 1.0 • October 2026

Premium, glamorous, cinematic experience. High-end nightlife meets luxury island resort. Soft atmospheric lighting, elegant neon accents, warm intimate ambiance. Store-safe: flirtatious adult themes with zero explicit content.

1. Core Concept

Players enter a beautifully designed virtual nightlife district called “Her World”. The experience opens with a polished “Welcome to Her World” title sequence featuring professional lighting effects, soft particles, and elegant ambient sound. Players create or choose an avatar, then explore themed rooms and lounges featuring attractive models of different ethnicities. Players can tip, send champagne, flirt with emojis, chat, watch performances, and unlock private VIP interactions — all powered by a token system. The overall feeling is luxurious, flirty, and immersive rather than explicit.

1.1 Design Pillars

- **Glamour over explicitness** — every interaction stays sophisticated and store-safe.
- **Premium mobile feel** — high production values, smooth animations, elegant UI.
- **Diverse representation** — models of multiple ethnicities in stylish evening / lingerie-inspired outfits (tasteful).
- **Token-driven economy** — clear value progression that encourages larger packages.
- **Light social fantasy** — conversation, eye contact, dancing, tipping, private VIP moments.

2. Player Flow

Title / Welcome Screen

Elegant animated “Welcome to Her World” with cinematic lighting, subtle particle effects, and high-quality ambient nightlife/island audio.

Avatar Selection

Clean avatar creation or selection (gender options + basic style customization). Becomes the player’s identity in the district.

Main District View

Stylish hallway or outdoor district with clearly named doors/rooms. Soft ambient lighting and music. Each door shows a theme/ethnicity indicator.

Room Experience

Player enters a well-designed lounge. One or more attractive models appear in elegant outfits. Optional dance stage. Idle animations, eye contact, subtle reactions.

Interaction Menu

Tip • Send Champagne • Flirt / Emoji • Chat • Request VIP / Private Time • Watch Performance. Models respond with animations, text, and emoji reactions.

Token Shop

Accessible anytime. Four packages mapped to real PayHere (or later Google Play Billing / App Store) links.

3. District Rooms (Launch Set)

Room	Theme	Host	Tag
Velvet Room	Deep reds & gold, intimate lounge	Sofia	Caucasian
Jade Pavilion	Soft lanterns, elegant Asian-inspired	Mei	Asian
Ebony Lounge	Rich tones, powerful presence	Amara	Black / African
Sapphire Suite	Cool blues & neon, modern mix	Luna	Mixed
Paradise Island	Outdoor cabanas, tropical night	Isla	Resort
Noir Cabaret	Classic stage, theatrical flair	Vivienne	Performance

Optional expansion: more hosts per room, rotating daily performances, seasonal Paradise Island events.

4. Token Economy

Tokens are the sole soft currency. Starting balance for new players: 250 tokens (enough for several tips and one flirt).

4.1 Action Costs

Action	Cost (✦)	Notes
Small tip / emoji	15–25	Quick positive feedback
Champagne	40	Visible celebration animation
Flirt	35	Warm text + animation reaction
Free-text chat message	20	Optional; keeps spam low
Watch exclusive performance	80–150	Stage / dance sequence
VIP – Intimate Conversation	200	Private chat + eye contact focus
VIP – Private Dance	320	Dedicated performance
VIP – Cabana Escape	450	Paradise Island private lounge

4.2 Purchase Packages (PayHere / Store)

Package	Price	Tokens	Value
Starter	$5.99	300	Entry
Premium Silver	$10.99	650	Good
Premium Gold (Best)	$29.99	2,000	Best value
Premium Platinum	$59.99	4,500	Whale

Live links (current prototype): Starter, Premium Silver, Premium Gold, Premium Platinum via app.payhere.co/cma-digital/…

5. Content Guidelines (Store-Safe)

These rules are non-negotiable for Google Play 17+ / App Store compliance and for the intended brand.

- No nudity, no explicit sexual acts, no graphic descriptions of sexual activity.
- Focus on glamour, flirting, dancing, conversation, tipping, and romantic/VIP atmosphere.
- Models wear stylish, form-fitting evening dresses, elegant lingerie-inspired outfits, or glamorous resort wear — always tasteful.
- Interactions feel sophisticated and flirty: compliments, emojis, light physical gestures (hand on shoulder, cheek kiss animation) — nothing explicit.
- Optional "Paradise Island" outdoor lounges and cabanas for a lighter vacation-style experience.
- All marketing assets and in-app screenshots must pass the same visual standards.

6. Visual & Audio Direction

6.1 Visuals

Realistic but stylized attractive characters, high-quality lighting, soft volumetric effects, elegant materials on clothing and environments. Premium mobile look. Dark UI theme with gold and soft neon accents. Large, clear

buttons. Smooth animations.

6.2 Audio

Smooth lounge / late-night city tracks mixed with soft tropical island ambience. Subtle reaction sounds and elegant UI feedback. Title sequence should feel cinematic.

7. Technical Recommendations

Prototype delivered as a self-contained HTML5/CSS/JS web app (mobile-first). Recommended production path:

- **Engine**: Unity (C#) or Godot 4 for cross-platform mobile + future desktop.
- **Characters**: Ready Player Me / custom 3D or high-quality 2D spine/Live2D for performances.
- **Backend**: Lightweight (Firebase / Supabase) for optional cloud save, analytics, and future multiplayer presence.
- **Payments**: Google Play Billing + App Store IAP; PayHere as temporary web fallback.
- **Analytics**: Track token sinks/sources, room popularity, conversion per package.
- **Moderation**: Chat is currently free-text with token cost; add keyword filters + report button before public launch.

8. Suggested Roadmap

Phase 0 – Prototype (Done) — Web playable loop, token shop links, 6 rooms, basic reactions & VIP.

Phase 1 – Vertical Slice — Replace emoji placeholders with real 2D/3D character art + idle & reaction animations. Add ambient audio. Polish UI.

Phase 2 – Soft Launch — Unity/Godot build, Google Play internal testing, real IAP, analytics, basic chat filter.

Phase 3 – Content Expansion — Additional hosts, daily login rewards, seasonal Paradise Island events, achievement system.

Phase 4 – Live Ops — Limited-time VIP experiences, referral codes, influencer partner rooms.

9. Store Compliance Checklist (Google Play 17+)

- Content rating questionnaire answered honestly (Mature 17+ for simulated gambling-like token spend + flirtatious themes).
- No real-money gambling; tokens are cosmetic / interaction currency only.
- Privacy policy + data safety section completed.
- IAP products correctly declared; no misleading “free” claims.
- All screenshots and feature graphic free of explicit content.
- Target audience and store listing text emphasize lifestyle / social lounge, not adult content.

Document prepared for AI-assisted development and internal team use. Prototype location: her-world/index.html — open in any modern mobile or desktop browser.
